FIELD- APPROVED

- 2 Shots
- 23 ft range
- 320 ft/sec* OC Blast
- Integrated Laser

JPX Jet Defender

The JPX Jet Defender is the most functional and powerful hand-held OC delivery system available today. The conventional gun design speeds training and ensures accurate solution delivery. The power of each payload combined with reloading makes the JPX extremely effective for law enforcement use. The JPX 2-shot cartridge holds two canisters filled with Piexol OC agent or with a marker available for training. The patented cartridge design provides an unique self-clean mechanism cleaning the nozzle from residues, so that after you fire one shot, you are not exposed to the residues from the fired barrel. There is a broad variety of accessories available. Check our website www.piexon.com for more details.
